

Translator.FM User Manual

1. step (translator):

The translator needs a computer to broadcast. Connect to the WiFi network in your home, office or anywhere.

Visit <https://translator.fm>

Download the app for broadcasting of translations.

Install the application.

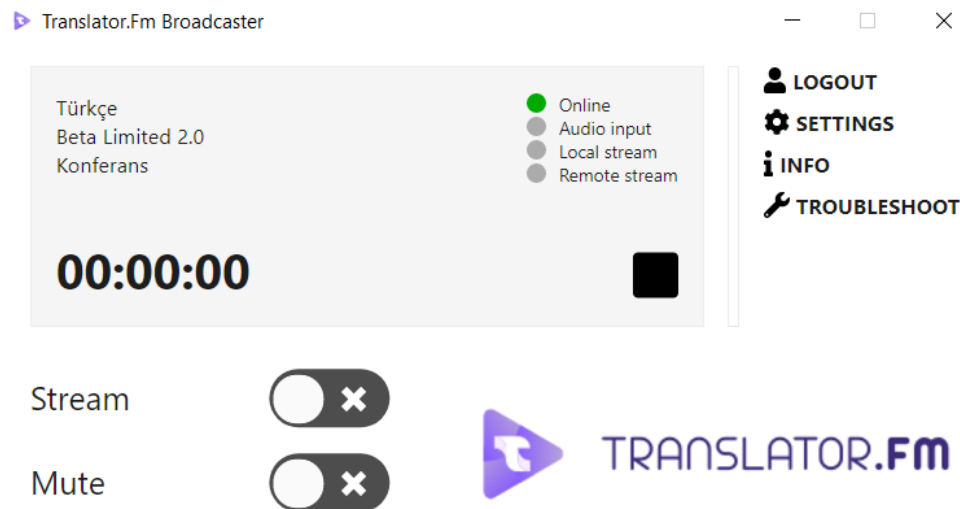

Log in to the system using the following information.

Event code: DEMO

Pin code: 123456

Select which language you want to translate on the computer you've installed on.

You will see below screen.

Press the Stream key to start the broadcast.

2. step (listener):

Connect to the WiFi network to which the laptop is connected to be on the same network.

Visit Apple Store or Play Store to download the app. You can also download it from our website.

When the application opens, it will ask you to enter the event code. Type "DEMO" in the event code section. (Depending on your modem's specifications, the system can recognize you automatically without entering the event code.)

Select the language in which you want to listen. (The language options are entered from the application on the translator's computer, language options are available for the number of translators.)

All you have to do is press play.

Important note: The modem you are connecting to must have multicast broadcast feature. Otherwise, you cannot broadcast.
